

Stacey Hall Thibodeaux, M.S.

Areas of Expertise

- Expertise in technical project management, including project design, budgeting, and supervision of technical staff.
- Significant experience identifying, analyzing, and summarizing Federal and State environmental rules and regulations as they apply to various operations and projects in multiple states.
- Expertise in the development of comprehensive regulatory compliance manuals, environmental safety programs, disaster response planning, regulatory compliance audits, and environmental permitting.
- Fluency in Federal and State environmental regulations, including CERCLA, RCRA, CWA, CAA, and OPA-90.
- Liaison expert with State Governmental Agencies

Professional Experience

Project Director

- Project Director and Technical Writer for 52-unit major petrochemical/refining facility including procedures for normal operations, startup, shutdown, safety, environmental, and catastrophic events.
- Project Director for multiple Underground Storage Tank assessment and remediation projects.
- Project Director of multiple pipeline emergency response planning projects including mapping, sensitive environment assessments, and emergency information reporting.
- Management of pollution prevention and permitting projects including air, water, and waste in Louisiana and Texas.
- Liaison between clients and state agencies.

Project Manager

- Project management for construction/installation of a synthetic wetlands sewage treatment system.
- Project manager for multiple facility-unit-specific Operations Manuals and Site Safety Plans.
- Authored hurricane preparedness and emergency response plans for multiple major petroleum/refining facilities.

Regulatory Specialist

- Completed various oil spill contingency plans including an Integrated Contingency Plan for the second largest refinery/chemical complex in the U.S.
- Developed documents for USCG, DOT, MMS, and EPA contingency planning regulations, EPA and DEQ SPCC regulations, and the Integrated Contingency Planning Regulations.
- Developed drill documentation manual for major industrial facility.

State Rulemaking Process

- Proposed all state hazardous waste rules between 1994 and 1996 including the Hazardous Waste Importation and the Waste Minimization Rules.
- Member of EPA advisory panel for streamlining State Authorization.
- Prepared economic impact statements for new regulations.
- Developed the Attorney General's Statements for Authorization Packages.

Federal Authorization Process

- Obtained authorization from EPA for the LDEQ to administer programs of RCRA.
- Responded to verbal and written public inquiries concerning the hazardous waste regulations and authorization.
- Responsible for developing and tracking the RCRA Grant Workplan for the Hazardous Waste Division.
- Led the Authorization Program from a six year backlog to finalization.
- Drafted administrative orders and reviewed permit applications and modifications.

Education

Louisiana State University - Baton Rouge, LA

M.S. Environmental Science, 1994

Southeastern Louisiana University - Hammond, LA

B.A. Economics, 1991

Additional Training

Permit Writing Workshop

Corrective Action Training

RCRA Orientation

Risk Assessment

Hazardous Materials/Waste Training

Data Quality Objectives
